

# BONALDO

## Optic

Designer: **Marco Zito**

Like in a dance, the Optic's two supporting frames perfectly slide together to create a spacious system of staggered shelves: the metal bookcase shelves are wider in the middle to accommodate large objects, while the side shelves are lighter and cantilevered. The shifted frames give the

bookcase a striking 3D effect and permit different configurations in the space: side by side on the wall, overlapping or in the centre of the room joined with an "L" arrangement as a partition within the room.
